

BASIC CREW STANDARD

Standard Description

This is one of the entry level Standards in the series of Sail Canada Standards on sailing keelboats and on cruising. It builds basic boating skills under sail and power, and develops the student's ability to assist in operation of an auxiliary powered sailing vessel as competent crew, by day, in light to moderate conditions. Individuals with minimal practical on water experience should consider completing the Start Keelboat Sailing Standard before attempting this standard.

A course leading to this Standard introduces the operation of a cruising keelboat both as a powered vessel and as a sailboat. Terminology used in describing the boat and on water activities is taught and used throughout the course. Practical topics under power include simple maneuvering skills as well as departure from and return to dock. As a sailing vessel, basic sailing skills are developed including sail selection, the use and positioning of sails to provide propulsion, and the operation of the vessel as crew. Required and recommended safety equipment is discussed as is the handling of emergencies that might be encountered while day sailing. The basic rules for avoiding collision with other vessels are explained and this information is applied during the practical sessions. The meaning of weather forecasts is clarified and the impact of weather on vessel operation, crew behavior, and on water activities is discussed. The curriculum includes an elementary introduction to the Canadian navigation system and to the basic use of charts and tide and current tables.

The program may be offered in a day sailing or live-aboard format. It is envisioned that the day sailing format will be taught in not less than 28 hours of which at least 18 hours should be devoted to practical sessions on water. In a live-aboard format the course may be offered over a period of 4 or more days. A challenge of the Standard may be accomplished in a minimum of 4 hours afloat plus completion of the written examination.

Objective

To be able to cruise safely in familiar waters as competent crew of a sloop rigged keelboat of 6 to 10 meters with an outboard or inboard motor in moderate wind and sea conditions by day. The focus of this Standard is on the development of crew oriented basic sailing skills, seamanship and knowledge needed to act as competent crew.

Prerequisites

None.

Ashore Knowledge

Section I: Terms and Definitions

The candidate must be able to:

1. Identify and describe the following:

Hull and keel	Gooseneck
Bow, beam and stern	Boomvang and topping lift
Fenders	Shackles and fairleads
Deck, cabin and companion way	Cleats and winches
Rudder and tiller/wheel	Pulpit and pushpit
Cockpit and self-bailing cockpit	Stanchions and lifelines
Gudgeons and pintles	Main, jib and storm jib
Mast and boom	Genoa and spinnaker
Spreader	Head, tack and clew
Shrouds and stays	Luff, foot and leech
Tangs and turnbuckles	Battens, hanks and slides
Chainplates	Cringles and reef points
Running rigging	Standing rigging
Roller and jiffy/slab reefing	Sheets and halyards
Telltails/Ticklers	Outhaul and cunningham
Spring and breast lines	Roller furling

2. Describe the following with the aid of diagrams:
Ahead, abeam and astern, forward and aft;
3. Define and be able to identify these terms from a diagram:

Port	Underway
Starboard	No way
Windward	In irons
Leeward	Beating
Tacking	Sailing by the lee
Gybing	Running
Close Hauled	On a tack
Port tack	Luffing (of sail)
Starboard tack	Heading up
Leeway	Bearing away
Wash	Wake
Reaching (Close, beam and broad)	

Section II: Gear and Equipment

The candidate must be able to:

4. List from memory:
 - a) The Transport Canada required items for the candidate's boat (as per the *Small Vessel Regulations* and the *International Regulations for Prevention of Collision at Sea (Collision Regulations)*),
 - b) The recommendations for care and maintenance of PFDs, life jackets and other Transport Canada required safety equipment,
 - c) The recommended method of testing for buoyancy in a PFD;
5. Describe:
 - a) The reasons for keeping gear and equipment stowed in assigned places in a cruising boat,
 - b) The basic maintenance and frequency of maintenance of a recreational boat and its equipment so that it is capable of functioning at all times for the planned passage,
 - c) The minimum items recommended for a waterproof emergency kit.

Section III: Safety

The candidate must be able to:

6.
 - a) Describe the purpose of a safety harness and dangers of improper attachment in a cruising boat,
 - b) State the purpose of pulpits and lifelines;
7. Identify the required navigation lights for:
 - a) A vessel under sail, under power, and at anchor and describe the angles of each,
 - b) An unpowered vessel less than 6 meters in length;
8. Define what hypothermia is including:
 - a) The signs and symptoms and the major areas of heat loss to the body,
 - b) Steps for prevention,
 - c) Treatment for mild and severe hypothermia,
 - d) The actions to be taken by one or more individuals in cold water to increase survival time;
9. Define what cold shock is including:
 - a) The signs and symptoms,
 - b) Steps for prevention,
 - c) Treatment for;
10. Define what carbon monoxide poisoning is including:
 - a) The signs and symptoms,
 - b) Steps for prevention,
 - c) Treatment for;
11. Describe the precautions taken to prevent undue magnetic influences to the vessel's compass;
12. Describe the common sources of fire and explosion and list the methods for preventing such occurrences and actions to be taken in the event of an onboard fire;
13. Describe safe refueling procedures;
14. Identify the two scuba diving flags;

15. Describe/list:
 - a) The danger involved in re-charging batteries,
 - b) How to safely launch flares,
 - c) The types of signals used to indicate distress,
 - d) The actions to be taken in case of a capsized;
16. Describe the uses, capabilities and limitations of a yacht radar reflector;
17. State the dangers of overhead power lines;
18. Describe:
 - a) Reasons for filing a float plan and who the plan should be filed with,
 - b) Items of important information which should be included in a float plan,
 - c) Reasons for completing a pre-departure checklist.

Section IV: Rules of the Road and Canadian Regulations

The candidate must be able to:

19. Demonstrate knowledge of the Collisions Regulations:
 - a) Describe the application of and how to comply with rules 5 to 10,
 - b) Apply Collision Regulations Rules 13 to 21 by means of diagrams;
20. Identify and describe the following:

Pleasure craft	Power driven vessel
Sailing vessel	Recommended gross load capacity
Compliance notice / Capacity plate	Recommended safe limit of engine power
21. Identify:
 - a) Four considerations in determining the safe speed to operate a vessel,
 - b) The actions and precautions to be taken in restricted visibility,
 - c) Responsibilities when operating in a commercial traffic lane;
22. Demonstrate knowledge of regulations applying to boaters as follows:
 - a) Identify the minimum required publications for operating a 10-meter pleasure vessel in unfamiliar waters,
 - b) Describe the guidelines for licensing and how a license number must be marked on a vessel,
 - c) Identify the principal acts and regulations that a pleasure craft operator should be knowledgeable about and the areas covered by each including:

<i>Canada Shipping Act (2001)</i>	<i>Small Vessel Regulations</i>	<i>Contraventions Act</i>
<i>Vessel Operation Restriction Regulations</i>	<i>The Criminal Code of Canada</i>	<i>Collision Regulations</i>
<i>Competency of Operators of Pleasure Craft Regulations</i>		

Section V: Weather

The candidate must be able to:

23. State three sources of marine weather information;
24. Interpret the marine weather forecast applicable to the area of operation, and describe how to apply the information as follows:
 - a) Determine whether it is safe to set sail in the candidate's boat,
 - b) Decide what changes are forecast for the next six hours and what expect these should have on the day's planned activities,
 - c) Identify the wind speeds associated with:

Light winds	Moderate winds	Strong winds
Strong wind warning	Gale warning	Storm warning
25. Describe local weather hazards, how they can be identified, the normal warning time available, and the actions to be taken to reduce/avoid effects.

Section VI: Duties of the Skipper and Crew

The candidate must be able to:

26. List the main responsibilities of the skipper and crew as listed below:

Skipper

 - a) Safety of crew and boat,
 - b) Briefing on location and operation of lifesaving and other safety equipment prior to getting underway,
 - c) Assigning duties,
 - d) Instruction in the safe use of the boat's equipment while underway,

- b) participate in a crew briefing;
- c) assist in confirming that the vessel and crew are fit for the planned activities.
- 4. Select and bend on (if required), check and stow / secure or furl sails;
- 5. Coil a line (perfect and figure eight) and secure (temporary, sea coil, pull-through);
- 6. Properly stow lines and fenders;
- 7. Demonstrate safe winch techniques with particular emphasis on:
 - a) Possible high loads on the winch and prevention of excessive strain on sheet/halyard,
 - b) How to avoid riding turns (and how to clear),
 - c) Position of hands/fingers,
 - d) Fitting and removal of winch handles.

Section IX: Manoeuvring Under Power

The candidate must be able to:

- 8. Start auxiliary engine on vessel **and under direction of the skipper depart from dock** observing commonly accepted safety practices;
- 9. Come to a full stop with **stem (bow)** one half boat length away from a buoy using reverse. (The objective of this manoeuvre is to know how much distance is required to bring a vessel to a full stop. Vessel is to be kept on a straight course while the manoeuvre is being carried out);
- 10. Manoeuvre and stop a vessel under power to a position alongside and parallel to a dock portside to and starboard side to not more than two feet off without the aid of lines, without the stern passing a given mark at any time during the manoeuvre;
- 11. Apply Rules 5 through 18 of the *Collision Regulations* as applied to a vessel under power;
- 12. Lower the anchor under the direction of the skipper, at the helm or handling ground tackle, under power. The boat will be in more than 3 meters of water and the anchor must not drag when tested under engine power at half-throttle astern;
- 13. Raise anchor under the direction of the skipper with boat ready and get under way, at the helm or handling ground tackle, under power;

Section X: Handling Under Sail

The candidate must be able to:

- 14. Set the basic sails while under power/at anchor, or mooring (head to wind, hoist main sail first), set appropriate luff tensions, and flake halyards;
- 15. Apply Rules 5 through 18 of the *Collision Regulations* as applied to a vessel under sail;
- 16. Act as crew responding to commands while demonstrating the proper techniques of beating, reaching and running; tacking and gybing; heading up, bearing away, luffing and heaving to; using the following commands and responses:

Commands	Responses	Alert
“Head Up”		
“Bear Away”		
“Ease Sheets”		
“Harden Sheets”		
“Ready About”	“Ready”	“Helms-a-Lee”
“Ready to Gybe”	“Ready”	“Gybe Ho”

- 17. As crew, assist the skipper in the management of the sail plan for different wind conditions and points of sail while keeping the vessel under control, either at the helm or controlling the sails by:
 - a) Reefing and shaking out the reef in the mainsail,
 - b) Reefing and shaking out the reef, or changing the headsail,
 - c) Easing or hardening sheets to achieve sail trim appropriate for the point of sail and conditions;
- 18. Demonstrate in response to the skipper's actions/commands, while under sail, the Triangle Method Crew Overboard procedure. Consider the crew overboard is wearing a PFD and able to assist him/herself;
- 19. In response to a Crew Overboard situation, both assisted and unassisted, bring the vessel into irons. Start the engine, lower or furl sails as required to gain control of the vessel, ensuring on-board control of all lines, and manoeuvre the vessel under power for a successful Crew Overboard recovery;
Note: Both Performance Objectives (PO's) 18 and 19 above must be completed in reasonable time without losing sight of the victim or marker in the water.
- 20. Lower or furl sails while under power or at anchor or a mooring

Section XI: Making Fast and Snugging Down

The candidate must be able to:

21. Secure a vessel to a dock using appropriate dock lines to prevent excessive movement and set out fenders correctly;
22. Stop auxiliary engine and secure when departing vessel for night, observing commonly accepted safety practices;
23. Tie the following knots, bends and hitches within 30 seconds each:
 - a) Figure Eight,
 - b) Reef Knot,
 - c) Double Sheet Bend,
 - d) Bowline
 - e) Clove Hitch,
 - f) Round Turn and Two Half Hitches,
 - g) Belay a line to a cleat

Outcomes and Evaluation

Candidates are expected to demonstrate the ability to safely operate the vessel in daytime in moderate conditions as competent crew. These capabilities will be evaluated as part of the practical sessions. Candidate theory knowledge will be evaluated using a closed book written exam. For certification a 70% mark on this written exam is required. On successful completion of the practical sessions and the theory exam students will be awarded the Sail Canada Basic Crew Standard.

Additional Notes

This Standard covers an extensive suite of practical skill and theoretical knowledge. Students who have completed the Sail Canada Start Keelboat Sailing course or who have previous sailing experience will find that experience beneficial in achieving this Standard. Practical sessions are typically offered on keelboats in the 6-10 metre range. Training is typically conducted with 3 or 4 students and the instructor on board. Some schools or clubs may offer programs leading to this standard on larger vessels and may offer training times in excess of 27 hours.

Physical Requirements for Candidates

These training sessions will require short periods of moderate upper body exertion, and a moderate level of arm strength. Participants will have the opportunity to experience sun, wind, spray, rain, and temperatures consistent with the time of year they take part in this activity. When underway the vessel may exhibit irregular motion due to wind and waves and temperatures may be cooler than on land. Participants will be expected to learn and demonstrate skills and perform tasks while the vessel is at the dock, at anchor, and when the vessel is underway. In a day sailing format, vessels will be underway for varying periods of time (up to 8 hours), during daylight, in light to moderate wind and sea conditions. These sessions are suitable for most fitness levels and will provide a good body core workout.

Participants taking courses offered in “live-aboard cruise and learn” formats may also be subject to conditions normally associated with the Intermediate Cruising standard.
